

FOLLOW THE PATH TO INFORMED CONSENT

1

Examine the current recommended [vaccine schedule](#).

2

Find a **healthcare provider** that honors the process of informed consent and is willing to openly discuss the issues surrounding the current recommended vaccine schedule and support a proper risk/benefit assessment. If you need help finding someone, please contact info@texansforvaccinechoice.com.

3

Research the Infections & Pathogens the Vaccines are supposed to impact.
Find out what those acronyms mean!

4

Then **ask yourself this basic question** for each of the 81 doses of the 16 vaccines proposed on the recommended schedule: **“AM I CONCERNED ABOUT MYSELF OR MY CHILD ACQUIRING THIS INFECTION/PATHOGEN?”**

IF YES

RESEARCH RISK/BENEFIT TO NATURAL INFECTION

- What is my/my child's level of risk for acquiring this infection/pathogen?
- What is the natural infection process and common outcome for this pathogen?
- Is this infection/pathogen treatable? What is the treatment and how accessible is the treatment?
- Are there any known benefits acquired through infection?
- How long does natural immunity last?

RESEARCH RISK/BENEFIT TO VACCINE

- How does the vaccine protect its recipients and for how long does it provide that protection?
- Does the vaccine prevent infection or transmission of the pathogen?
- Will this vaccine protect from all versions of this pathogen, or will it just cover the ones included in the vaccine?
- What are some of the [ingredients in vaccines](#) and how do I feel about injecting these ingredients into myself or my child?
- What are the [possible adverse events](#) following vaccination and [what happens](#) if I or my child experiences one?

**MAKE AN INFORMED CHOICE REGARDING EACH VACCINATION
EXPLORE ALTERNATIVES TO VACCINATION AND IMMUNE
SUPPORT MEASURES**

IF NO

- Consider exercising your [Texas exemption rights](#) by [declining a vaccine](#).
- [Religious exemption](#) tips for employees.
